- What will be the relevant skills in 2050?
- How important are creative skills?
- How creativity works in the brain?
- How can parents help developing creativity?

Claire Blondel has lived and worked in the education field in 6 different countries, practicing various approaches (Montessori, Reggio Emilia, Active Pedagogy). In Canada, she was in charge of a scientific watch to bring practical tips into the classroom. Since her return in France in 2016, she took part in different organisations. Her actions are all driven by the will to help the Educational system building up the skills we would like to see shine in the world: cooperation, creativity, empathy, positive leadership (Ecole pour demain / Atelier pour Demain / Sapiens). She also teaches at universities (UTC, INSEEC) helping young adults to reflect on their qualities and pursue this reflection onwards.
